About This Game

Battle Norse raiders, ghosts, and changelings to save medieval England! But beware, if the elves can capture the Book you hold, the world will end.

Chronicon Apocalyptica is a 250,000-word interactive medieval fantasy novel by Robert Davis. It's entirely text-based, without graphics or sound effects, and fueled by the vast, unstoppable power of your imagination.

You are an Anglo-Saxon scribe in the year 1000. You hold a Book of secrets written generations ago, including this prophecy: "When Æthelred II is King, he shall not be King, but there shall be an elven changeling in his stead. Should it gain this book and its ink, the world he shall rend asunder."

The witan advisors to Æthelred have tasked you with a secret mission to research whether the Book is true. Build an unlikely party of adventurers: a nun, a holy warrior, a bard, a beekeeper, and his bee, each with a mysterious past. Judge a witch trial, infiltrate the magical land of the elves, and even travel through time on your quest to extract fact from fiction.

Lovers of England's mythic history will delight as you meet Excalibur, the Green Children of Woolpit, and the Tremulous Hand, a creepy disembodied hand with a predilection for parchment. Put your analytical, investigative, and storytelling skills to the test as you decide where your loyalties lie: to the church, the crown, or the people of England.

Will you uncover the secret at the heart of English history, or succumb to the evil of the most deadly book ever created?

THIS GAME IS WORTH ITS MONEY!!!

u normally dont expect anything for 0.99€ but this game is kinda fun.

. Wow, I think that this game is for the nostalgic persons like myself who played this as a kid. It made me go way back in time and it was great. Although I would still suggest it today as a simple game if the child is more of a visual learner.

Story - You are Fatty Bear: a magical being comming to life at night to prepare the best birthday of your best friend, Kayla. With the help of her other toys, you have to prep the balloons, the decoration and best of all, bake and decorate her birthday cake!

Gameplay - It's mostly a point & click adventure/discovery game when you have to walk around the house to find all the ingredients for the cake and the decoration. There are some puzzles involves and some backtracking to do but it's mostly straight forward. There is also a bowling game which is not at all related to the story. I think the best aspect of it all is the interaction. In every rooms, there is a ton of objects that have a fun little animation that makes the thrill of the search more interesting.

Graphic & Sound: There is not much to say here. I think that for it's age, it's a good looking game. Colors and objects are well defined. Animations are plenty, fun to watch and are very varied. There is not much dialog in the game but it's entirely voice acted. There is also a piano mini-game with pre-made popular lullaby. You can even make your own little song!

In all, it's a very short and simple game. As an adult, it took me about half an hour to complete but I guess it would take more time for a kid. After 23 years, this game is still as fun as I remembered it and I'm glad I had the chance to relive that adventure!! I don't even want to go back and look at this game for the "proper" sort of review. So I'll just say this. No. Don't touch. Save yourself some money. Or go to a movie in the theaters.

Just don't. Leave.

Why are you still reading? Get the FFFFFFFF--- off of this page and never come back.. Really difficult, like it says in the description.

Only a single music track to enjoy while you are parkouring.

If you liked Mirror's edge but hated all the story involved, this is the game for you.

<https://youtu.be/VdQqnM7CFYic>. The graphics are old and out of date, but the game is fantastic. One of the all-time best turn based strategy games ever made. I've played this game for well over a decade and will likely put countless hours into this game now that I've found it on steam. Doesn't take much to learn the game, and is extremely fun.

If you like Civ5 or similar games, you should like this game.

it plays like a flash game, enough said. i like the plot and it was a simple puzzle to solve. Pros:

+ Fast-paced not-so-realistic FPS, which focusses on just "just get in there and blow stuff up", rather than being so tactical.

Probably the most "gung-ho" game I have ever bought.

+ It's fun, not hard at all, and doesn't require too much thinking, which is great sometimes after a hard day at work!

+ Remote-guided drones add a feeling of modern day tactics.

Cons:

- Graphics is a bit dated.. First of all, we should always appreciate indie games, and I've always been a fan of the indie horror genre. That being said, this is a bad game. Of the ~3 hours of total play time, it does have it's various scary bits. The real issue is the tedious and useless gameplay in between. It's mostly trial and error 'puzzle' sequences without any real hints or player direction, with a non scary dead woman roaming the halls periodically. Graphically it was buggy, for some reason on a gtx 1080, and had a few weird bugs throughout. Overall, probably a 4 or 5/10
