Mistakes were made during the purchase of this game.

Of all the stupid pervy VNs I've played where the whole point is just to look at naked people with text moving across the screen, this is easily the worst and least entertaining of all of them.

The girls go into the time paradox device, and their boobs get bigger in the vortex

Don't buy this game. There are better VN out there that don't cost money.. Disclaimer: Key provided by developer for review purposes.

After 45 minutes walking along a mostly uninteresting path, I tried to walk up a path between some rocks, passing by a tree and I tried to jump when I hit what seemed to be an invisible wall. Then I got stuck. I saved and reloaded the game, but still stuck in the same spot. I quit the game and go to the discussions area to investigate the problem and see the only solution is to load the last checkpoint *before* exiting the game.

So, game-breaking bug spoiled it entirely for me as that gamesave is now useless.

Along the way, the narration was decent and the sounds of the weather pleasant. I liked the sounds of the thunder in particular. Graphically the path was a tree appreciation journey.

Along the walk, I never found a single item to interact with. Without any in-game tutorial, I looked up the controls to see there was indeed an interact button though.

With the game-breaking bug present I cannot recommend the game at this time.. I really liked this game. The main character has a distinct personality, the storyling is interesting, and the worldbuilding is great.. the mechanics are really fun and the levels are good too, fast paced platforming and fun physics would recommend for a good 4 player multiplayer game. Short, easy, fun and cheap puzzler.. Have you ever been so bored at your IT Job that you thought that a zombie apocalypse could make your day ?

Last Hours of Jack is your game!!

An awesome melee mechanic and one of the funniest stories will lead you to hours of fun.

Definitely 10/10.

The best indie game i\u00b4ve tried this year and probably the funniest ever.

. The first boss is an utter pain.

This game is pretty in a cartoony sort of way. It's fun to mindlessly play and blast some zombies dead.

But the first boss is really hideously difficult to kill. I assume this is supposed to be multiplayered, because doing it on my own just wasn't happening. Got him half way down and just got clusterbuggered by bats.

A shame most of the upgrades are locked behind progress, if you're unable to do it with a mass of upgrades, it's just not happening.

Oh well. If you've got a friend to play it with, give that a go, might go a lot better. Otherwise, I cannot recommend this, sorry.

Sorry, I did not see the developer response. I cannot remember if I tried an easier difficulty. I remember having a lot of issue playing the game, getting very angry at it.

I may try again some day, unlikely, but we'll see. And if I do, I will be sure to rewrite this.

Sorry I could not be of more help.. Horrible, horrible movement system. Makes it really hard to navigate.. I can't quite put my finger on it, but this game really scratches an itch for me. It's an interesting blend of old school X-Com, Minecraft, and a little bit of tower defense thrown in for good measure. I find it hard to put down as there is a continual "in a few more seconds my next step in the grand plan will come to fruition". It's definitely still being polished but there is a lot here to like already. I've easily gotten my money's worth already, and am still discovering things each time I play.

HOWEVER: This is a game that is pretty safe to say died in early access. While I greatly enjoyed the time I put into it (almost 70 hours, wow), I cannot recommend its purchase to anyone at this time - the game is playable but is pure sandbox now. If a classic xcom-esque sandbox is your thing, maybe this is worth a look, but caveat emptor.

So changing my recommendation from "yes" to "no" - worth the price to me personally, but probably not for most.. Auto scroller where you shoot down to jump, shoot forward to kill. Simple concept, good execution. I like it. Overall a good game you can take one level at a time without worrying about long stretches of game without any save points.

The game is really fun and addictive! Definitely a good buy if you like this sort of arcade game. Reminds me of Resogun. I don't care if you found 10 rusty dollars in your boots and want to get rid of it, don't spend it on this garbage. It's a great game. I'm a fan since 2010 or so. It was running smoothly then and it is the same now. Don't listen to people complaining about the plot - it seems a bit cheesy now, but as for 2010 it was great. I'm a big fan of the overall look of the game. The atmosphere in the first part of the game is unique and appealing. You're a young mage (not the most diligent one) in the famous magic academy. An adventure lies ahead of you. There's autumn outside which adds a bit of melancholy to the scene and the music there is complimenting it beautifully. Everything is perfect. For the time being. And then all the hell breaks loose. In some parts the game's truly scary and unsettling, in some - beautiful and soothing. Gameplay is addictive and even to the present day haven't lost its dynamic. Some spells are OP but that's even more fun. Definitely would recommend. Nice layout. Soundtrack is incomplete and missing some of the best tracks, despite the 'About this Content' section stating "Enjoy the complete musical soundtrack to Psyonix Studios' insane driving-meets-soccer video game, Rocket League!"

Presumably that's a suggestion rather than representative of what the product actually is, hmm?. Could be nice at the beginning of VR. Right now is only a tech demo. This is the best Half-Life game I've ever played. I love this game so much. I remember when this game had a nice small community of active players and an active developer, it's a shame that I had to give this a negative review but I feel like this game was abandoned by the developer, I miss this game.
