I was wondering if it was possible to add something like this to after effects CC 2015? Any ideas would be great. A: After Effects has a built-in compress effect. See here: [Toxic effect of cadmium on the activities of some enzymes of the citric acid cycle in the liver of the earthworm *Lumbricus terrestris*]. It was shown that prolonged exposure of earthworms to cadmium reduces significantly the activities of alpha-ketoglutarate dehydrogenase and pyruvate dehydrogenase in all the studied organs. The activity of succinate dehydrogenase and NAD-isocitrate dehydrogenase is decreased in the muscle and the whole body of the earthworm. The activity of alpha-ketoglutarate dehydrogenase is slightly inhibited in the liver of the earthworm. Effect of N-acetylcysteine on radiation-induced acute mucositis in breast cancer patients: a randomized double-blind trial. N-acetylcysteine (NAC) is an antioxidant that has been shown to reduce tumor necrosis factor (TNF)-alpha production and protect human cells against radiation-induced injury. This study aimed to determine whether NAC is beneficial in preventing radiation-induced acute mucositis in breast cancer patients. In this randomized double-blind placebo-controlled clinical trial, 50 patients with breast cancer were assigned to receive either NAC (1.2g/m<sup>2</sup>) body surface area, administered twice daily for 12 weeks) or placebo after whole-breast radiotherapy. Primary end point was the incidence of acute mucositis during radiotherapy. Secondary end points were the dose-volume parameters of the whole radiotherapy treatment course. We observed a significantly higher mucositis rate (88.5% vs. 62.0%, P = 0.004) and a significantly higher mean level of TNF-alpha in the serum (7.50 vs. 2.40 pg/ml, P = 0.007) in the placebo group compared to the NAC group. In the NAC group, the incidence of mucositis during radiotherapy was 56.9% and in the placebo group, 100%. The dose-volume parameters of the 82157476af
