the first time i died by jo macgregor. the first time i died went something like this. first time i died movie. the first time i died book. the first time i almost died. the first time i died wow. the first time sam dies. that was the first time i died. the first time someone died. i was 27 years old the first time i died. the first time i smoked weed i died. james patterson the first time i died. the first time i died. i remember the first time i died. to the best of my recollection the first time i died. the first time goku died

I recommend this game for one reason, it has potential. It seems a good story with good music and an old school feel. But it crashes a lot, and i've yet to get past the first chapter because of the shut downs. Also, there seems to be no way of full screening it, though that may be my own error. For being a two dollar game, i think it is totally worth being patient for. It really seems like, if it actually worked, the game would be totally worth playing if only to hear the story out.. I am enjoying this game quite a lot and have noticed that there is only one review. While I have not finished this title (I am stuck at the moment) I have enjoyed it enough that I felt motivated to leave my thoughts on it here. While not a horror game per se it does have a creepy atmosphere that will allow you to get sucked in if you let it. The game-play is pretty standard rpg maker fare and reminds me a bit of Final Fantasy 4 in terms of interface outside of combat and early Dragon Quest games in combat. However you are able to make literal life or death decisions that seem to have an impact on the story as a whole. There are puzzles aplenty in this game and a

wrong decision can cause instant death. I would advise saving often to avoid frustration, As a whole though this is a good game that more people should give a try. My review is not complete but merely a placeholder that I will leave here until I have completed my play through.
